Microsoft PowerPoint 2013 - Level 2

Course Overview

Meetings, instruction, training, pitches; these are all a part of our daily lives. We are often called upon to deliver presentations with little notice, at multiple venues, and with varying requirements, and that includes sensitive information that needs to be guarded. Given all the variables, it may seem an overwhelming task to deliver your content, on time, to all audiences, and to only those who need to see it. Oh, and by the way, you need to make it interesting, informative, and memorable. So, how do you do it? Without the help of a robust set of tools, it would be nearly impossible. But, PowerPoint 2013 provides you with a variety of such tools that can help you deliver content in nearly any situation, while saving time and effort.

By taking advantage of these tools, you will be creating presentations that not only stand out from the crowd, but also don't consume all of your available time.

Target Audience

This course is intended for students who have a foundational working knowledge of PowerPoint 2013, who wish to take advantage of the application's higher-level usability, security, collaboration, and distribution functionality.

Prerequisites:

To ensure success, students should have experience using PowerPoint 2013, running within the Windows 7 operating system, to create, edit, and deliver multimedia presentations. To attain this level of knowledge and skills, you can take the following logical operations courses:

- Microsoft® Windows 7: Level 1
- Windows 7: Transition from Windows XP
- Microsoft® Office PowerPoint® 2013: Part 1

Duration

1 Day

Course Content

Module 1: Modifying the PowerPoint environment
